DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 06/28/04 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 3. Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Doherty 5,904,296. Doherty shows a snowplow, in figures 11-12, having a frame; a snowplow blade fixedly attached to the frame; at least a first actuator 247 operatively

connected to the snowplow blade for use in maneuvering the snowplow blade, control electronics (figure 10) operatively connected to engage the at least a first actuator; and, wherein the control electronics are preprogrammed to automatically cycle the snowplow through a sequence of operations (col. 14, lines 4-68, col. 15, lines 1-61).

As concerns claim 23, shows the at least a first actuator operatively connected to the snowplow blade for use in maneuvering the snowplow blade is a first hydraulic 247 actuator operatively connected between the frame and a first portion of the snowplow blade; and a second hydraulic actuator 247 operatively connected between the frame and a second portion of the snowplow blade; wherein the control electronics (figure 10) are operatively connected to selectively independently engage the first and second hydraulic actuators (col. 14, lines 4-68, col. 15, lines 1-61).

Allowable Subject Matter

4. Claims 24-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas A. Beach whose telephone number is

Art Unit: 3671

571.272.6988. The examiner can normally be reached on Monday-Friday, 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 571.272.6998. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
